

Business Experience Energy plant Hengelo

June 14th and 15th, 2021

Both days from 9.00 till 13.00

What will you do?

You will optimize the processes of the Energy plant in Hengelo. Together with a team you will look for energy-neutral or even energy-generating solutions for complex problems. Technical expertise, process insight and innovation are key. This is a realistic reflection of the work at Witteveen+Bos. More info: www.vechtstromen.nl/buurt/projecten/energiefabriek

Where does it take place?

The experience is completely virtual. You will enter the sustainable and circular Energy Factory in Hengelo from your own computer. In the Energy Factory economic, sustainable and circular energy are recovered from the fermentation of sewage sludge which is released during the sewage treatment from water authority 'Vechtstromen'.

The team

You will work in a multidisciplinary team consisting of university students (master) with a background in mechanical engineering, electrical engineering, IT & computer science, mathematics and physics. You will also receive guidance from experienced Witteveen+Bos employees.
